

I have been a licensed amateur radio operator for 42 years and also hold a General Class Radio Telephone License (First Class Phone) since 1969. I believe BPL will be a mistake if implemented in the US. Tests have already shown that it will cause extreme interference to the radio spectrum from 2 to 80 mhz. Amateur radio has been the only communications available in times of disaster. It will also affect public service, business radio and the low end channels of broadcast TV. I urge you not to consider implementing this system in the US.

Sincerely,
Ed Koch
